Jordan Takumi Davis, better known as Takumi, is an aspiring architecture student at Carnegie Mellon University. Since discovering LEGO and architecture’s potential as a diverse field, Takumi has strived to become a licensed architect to design residential areas.

In addition to architecture, he has various other interests. He currently studies myriad languages such as Japanese (his maternal tongue), Spanish, Portuguese, Russian, and others. Also, he takes interest in reading, photography, animation, and travel.

Description

Cube House was the final project of the 48–100 Studio I course. It dealt with the incentive of creating a cube-shaped wedding pavilion alongside Lake Erie. Initial inspiration derived from three set planes and drawings (top). Spatial sense, aesthetics, and overall experience were all factors for the project, resulting in a wooden model (bottom).
